Wichita Falls Fire Department Announces New Partnership

Wichita Falls, Texas – The city of Wichita Falls Fire Department is excited to announce a new partnership with Work Services Corporation (WSC). After an initial assessment from Fire Chief Ken Prillaman, he saw an opportunity to outsource a component of the city’s fire hydrant maintenance program. Through discussions with WSC, the agreement was reached to contract with WSC to utilize their employees to begin painting the fire hydrants. This partnership aligns with WSC’s mission to improve the quality of life for persons with disabilities through training and employment, while also meeting the Fire Departments need to maintain our fire hydrants.

Fire Chief Ken Prillaman said, “I am happy to have found a business within our community whose goals and objectives align with an on-going need of the Fire Departments. Strategically, this partnership allows us to continue providing excellent protection to our residents in a fiscally responsible manner, while also supporting an organization whose mission it is to create opportunities for persons with disabilities. We want to make sure residents are aware of the changes, as they will begin seeing the WSC employees painting fire hydrants.”
