## Road Closure and Detour on Brook Avenue Between Dayton and Ardath

Wichita Falls, Texas – The Sewer Rehabilitation Division will be performing a scheduled sewer line repair on Brook Avenue, between Dayton Avenue and Ardath Avenue. The routine repair will begin Monday, November 2, at 8AM. Once the repair work is completed, the roads will remain closed as the street repair will then begin. Once both projects have been completed, the roads will be re-opened for use. There will still be access available to the businesses located on the West side of Brooke Avenue while the work is being performed.

This repair will require the closure of both the North and South bound lanes of Brook Avenue. Please see the attached map for the detour routes.

- South bound traffic on Brook will divert West on Dayton to Deerwood, and then East back to Brook along Ardath.
- North bound traffic on Brook will divert east on Ardath to Marshall, and then West back to Brook on Dayton.

Please take this road closure and detours into account when traveling on Brook Avenue. We appreciate your continued understanding and patience as we continue to maintain the sewer system.
