COVID-19 Vaccine Waitlist Registration Now Open

Wichita Falls, Texas – The Wichita Falls – Wichita County Public Health District has opened the COVID-19 vaccine waitlist registration at wichitafallstx.gov. This begins Phase 2 of the Health Districts COVID-19 vaccination plan. All individuals who qualify for Phases 1A and 1B, per the Texas Department of State Health Services (DSHS), are now eligible to register for the waitlist.

Once the registration form is completed, individuals will receive a QR code which confirms their name has been added to the waitlist. It is recommended to use a mobile phone to register, so individuals can take a screenshot of the QR code at the end of registration. As the Health District receives vaccines and is ready to schedule clinics, a text message will be sent, following the order of the waitlist, notifying the individual of clinic availability. From there instructions will follow to select an appointment date and time.

Individuals who previously signed up on the Health District's original waitlist, but who do not qualify for Phase 1A and 1B, will still remain on a separate waiting list. Once DSHS opens the next phase of vaccination, those individuals will be priority and transitioned to the main waiting list.
