City of Wichita Falls Fire Department to Implement The Compliance Engine

Wichita Falls, Texas – The Fire Marshal’s office has selected “The Compliance Engine” from Brycer to automate the tracking and reporting of fire alarm and fire suppression system inspections and repairs.

Contractors who maintain these systems for commercial and residential properties will be able to upload inspection and repair information into the new automated system, reducing manual processing for the contractor and the fire department, while improving communication regarding the availability and reliability of these systems.

Wichita Falls joins hundreds of other jurisdictions across the country who rely on The Compliance Engine and expects to see a significant improvement in reporting and compliance.

The Fire Marshal has set April 1, 2021 for the implementation date.

For questions, please contact the Wichita Falls Fire Department at (940) 761-7901.
