### Midwestern Parkway Bridge over Holliday Creek

Wichita Falls, Texas – The outside lane, or North lane, of West bound traffic on the Midwestern Parkway Bridge that crosses over Holliday Creek is currently closed to traffic. This is due to a defect in that lane that City engineers have discovered. The City engineers are evaluating repair options with the assistance of the TxDot Bridge Division. Staff is continuously monitoring the bridge and the outside, or North lane, will remain closed until repairs are completed. The South lane is still safe for travel.
