

## Auto Maintenance Used Oil/Fluids Disposal

Oftentimes, do-it-yourself oil changers improperly dispose used motor oil by placing it in the trash, pouring it on the ground, or pouring it down a storm drain. The consequences for our environment are polluted ground and surface waters. It takes only one quart of oil to contaminate thousands of gallons of water. We can prevent this by recycling used oil.

Don't forget to recycle used motor oil from small engines. Mowers, ATVs, UTVs, and motorboats all use motor oil. Even the small amounts from these motors can pollute soil and groundwater if discarded improperly.

You can support recycling by purchasing re-refined lubricating oil for your engines. Look for the API certification mark, which tells you that the re-refined oil meets all standards.

### Tips for recycling your used oil and filters

1. Used motor oil and filters should be taken to one of the centers listed below.
2. Call site first to confirm hours, materials, and quantities accepted.
3. Transport oil in leak-proof, tightly-sealed container. Most centers accept up to five gallons at one time.
4. Put oil filters in resealable bags or other leak-proof containers for transport.
5. When at the site, always wait for an attendant to accept the used oil and filters.

### Disposal sites

Refer to the list below for disposal sites across the City of Wichita Falls. The list indicates the types of waste accepted and the site locations.
